Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach an electrostatic generator having two non-conducting, counter rotating disks mounted about a common principal axis with equal numbers of conducting sectors and having first and second charge collecting means, where the number is an odd number. The first charge collecting means has a first contact with the first disk, a second contact with the second disk, and a first conductor. The second charge collecting means disposed opposite to the first charge collecting means and having a first contact with the first disk, a second contact with the second disk, and a second conductor. The generator having a charge balancing means with a first grounded brush for contacting the first disk, a second grounded brush for contacting an opposing portion of said first disk, a third grounded brush for contacting the second disk, and a fourth grounded contact for contacting an opposing portion of the second disk, and a means for mechanically engaging the disks, and a plurality of conductors each connecting a pair of contact with said first disk, and a plurality of conductors each connecting a pair of contacts with the second disk.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
